Ring Festival, Lucca

"Heavy metal" brings to mind two images, first musical genre and second, the meaning of the term, heavy and thundering iron parts, in motion. Constantly passing from the one significance to the other, in this short work heavy metal takes on ironic and metaphorical meaning.

From evocation to celebration, the body tries in an absurd process to liberate itself from the past with an unlikely dance constrained by the limitations of the "costume", a typical medieval armor.
