Virgilio Sieni and Alessandro Certini, renowned protagonists of the Italian contemporary dance scene, after many years meet again to narrate friendship as it shapes time, in an exceptional artistic and human occasion.

Their last experience of creation together dates back to "Duetto", a 1989 collaborative production. Until then they had shared their art studies, their initiation into dance, the artistic experiences of those years... so many forms of friendship. So, with this work we retrace today their journey, certainly artistic, but also human and existential.

From the first steps: in the beginning everything seems innocuous, easy, automatic, inquiring. As time goes by, we will realize that gesture through dance is capable of restoring and listening and can allow us to literally travel in places of the body interwoven in the movement of time, to find ourselves again.

The forms and the movements danced constitute the framework of the performance and the story danced by the two choreographer-authors represents the "emotional words" of their thought addressed to common friendship.
